

Combat Casualty Care Research Program

Mission

The Combat Casualty Care Research Program (CCCRP) improves outcomes following combat trauma. In accordance with the National Defense Strategy, the CCCRP develops materiel solutions and expands knowledge in order to limit death and disability in the battlespace while maintaining combat power.

Primary Focus Areas

- |||| Offload medics and Warfighters cognitively and physically
- |||| Develop countermeasures to dominant physiologic threats
- |||| Return Warfighters to fight as expeditiously as possible
- |||| Maintain Warfighter and unit mobility despite injury
- |||| Minimize logistical burden while maximizing capability
- |||| Develop triage, casualty management and patient regulation strategies that do the most good for the most casualties to ultimately maximize the fighting force

- || Triage
- || Blood Products
- || Severe Burn
- || Hemorrhage Control
- || Prolonged Care
- || Forward Resuscitation
- || Traumatic Brain Injury
- || Organ Support
- || Extremity Injury
- || Biosensing
- || Autonomous Care & Evacuation
- || En Route Care

The U.S. Army Medical Research and Development Command is committed to creating and delivering medical solutions for our Service Members. Collaboration with academia and industry partners, like you, is essential to our success. We look forward to collaborating with you.
